

Briefing for Narrators

We're using Narrafix to streamline our editing workflow with roll recordings and reduce manual work. To help the software perform at its best and minimize unnecessary manual effort later, we'd be truly grateful if you could go through the following guidelines beforehand and keep them in mind during the session.

Mistakes? 1-2 Sec Pause – Then Start Again!

If a mistake happens, please silently restart the sentence or passage **after a small pause of a second** or more. Please avoid off-script comments like „I'll do that again“.

Avoid to Record Off-Script Information

Please **try to to avoid any off-script comments like „I'll do that again“ and other noises** if possible (like drinking, coughs) and pause the recording when you are not actively tracking the script.

Long Pauses or Interruptions

For extended interruptions (disturbances, phone calls, research, etc.), **please stop the recording** or remove the pause.

Do Not Add Acoustic Edit Markers

The files should **not contain any acoustic markers** (clicks, snaps, etc.). Visual edit markers in the session project file are also not necessary and will be ignored.

By following these simple guidelines, you help make our editing experience a breeze.
Thank you so much for your support!
